

Xiaoming Cai

System engineer at Ticnet

ming.cxm@gmail.com

Summary

web development and group management

Specialties

PHP, Javascript/Ajax, Css/Html/Xhtml, MySQL, Javascript libs such as Prototype, JQuery, Zend Framework, Actionscript/Flex, Erlang, Drupal website development, wordpress/bbpress

Experience

System Engineer at Ticnet

June 2012 - Present (4 months)

Ticnet is a part of Ticketmaster/Live Nation company.

Work involves developing and maintaining different site layouts with version controlled code base and a backend system. the challenge is to have good understanding of how the entire system works with many individual micro systems and how to integrate them. Besides, the cooperation among project teams which are not located at the same place.

SCRUM is used as the process here and its also a good opportunity for me to learn more about Sprint planning and risk analyze.

System developer at Fronter AS

January 2010 - May 2012 (2 years 5 months)

A new place where I can be involved in larger scale of projects and also work in larger groups. It is a challenge to deal with a mixture style of huge lines of code. Gained good knowledge of working in SCRUM team with daily Standup and Sprint planning.

System developer at Pearson Sweden

January 2010 - May 2012 (2 years 5 months)

System design and development.

Large scale of project base and integration.

Gained good knowledge of working in SCRUM with daily standup and Sprint planning.

1 recommendation available upon request

System admin at Misi.se

2009 - 2011 (2 years)

The main responsibility was to maintain the whole site and meanwhile focus on developing new web2.0

features to the current site. Dealt a lot with Wordpress plugin and customizations. During the time working at Misi, I not only enhanced my web skill, but also learnt a lot of e-business. So I think its a good project for me overall.

Web developer at Trodon IT AB

February 2007 - January 2010 (3 years)

Work as a web developer dealing with various kinds of web solutions

1 recommendation available upon request

System developer/Business partner at Moosecatch

February 2009 - June 2009 (5 months)

Did my thesis work together with some other business partners and therefore came out moosecatch.com as our thesis prototype.

1 recommendation available upon request

Shanghai Weiyu High school

1999 - 2002

Interests

video games, outdoor sports, traveling, sun, chatting with friends, working in fun teams

Xiaoming Cai

System engineer at Ticnet

ming.cxm@gmail.com

3 people have recommended Xiaoming

"Ming is a very good developer as well as a good team player. He has a wide range of skills in web development and always solves the problem that is assigned to him. I can very much recommend him to any type of web development work."

— **Josefine Ottosson**, *Teamleader / Front-end developer, Fronter AB*, managed Xiaoming at Pearson Sweden

"Ming is the hard working person, but at the same time very social and open minded. His chinese background, with the very disciplined educational system there, has taught him extraordinary endurance and persistence. This together with the skill he has collected abroad, both from studying at the IT University in Sweden, and from working in development firms and projects adds up to a very competent software engineer. Ming also has a, as I have experienced it, unique willingness to share his skills and knowledge within the groups he is a part of, but also a very high ability to learn from others."

— **Karl Annerhult**, *Student, Göteborgs universitet*, worked with Xiaoming at Trodon IT AB

"Ming is something as unique as a perfect blend of cultures. The analytical, diligent and loyal trades of Chinese together with the great humour, independent attitude and ability to go beyond the task! I was studying with Ming at Göteborgs Universitet where I also coached him. I also had the pleasure of involving Ming in several projects with my own company where he delivered beyond the call of duty. To me Ming represents a metaphorical valium in projects where dead-lines were tight and the assignment complex. I have no hesitation recommending Ming to anyone and consider everyone who has the pleasure of working with him a winner."

— **Christian Nilsson**, *Student, Göteborgs universitet*, advised Xiaoming at Göteborgs universitet
