- **Characteristics:**
 - Extremely enjoy working in a group but with a strong ability to work independently;
 - Modest;
 - Patient;
 - Endurance;
 - Flexible,
 - Creative,
 - Always be studious to new things.

REFERENCES & RECOMMENDATIONS

“Ming is the hard working person, but at the same time very social and open minded. His chinese background, with the very disciplined educational system there, has taught him extraordinary endurance and persistence. This together with the skill he has collected abroad, both from studying at the IT University in Sweden, and from working in development firms and projects adds up to a very competent software engineer. Ming also has a, as I have experienced it, unique willingness to share his skills and knowledge within the groups he is a part of, but also a very high ability to learn from others.”

---- Karl Annerhult (CEO at Kitom, kale@kitom.se)

“Ming is something as unique as a perfect blend of cultures. The analytical, diligent and loyal trades of Chinese together with the great humour, independent attitude and ability to go beyond the task! I was studying with Ming at Göteborgs Universitet where I also couched him. I also had the pleasure of involving Ming in several projects with my own company where he delivered beyond the call of duty. To me Ming represents a metaphorical valium in projects where deadlines were tight and the assignment complex. I have no hesitation recommending Ming to anyone and consider everyone who has the pleasure of working with him a winner.”

---- Christian Nilsson (CEO at C-Works SE, kanzie@gmail.com)
